IV THERAPY OPTIONS

- IV Fluids:** This sterile solution replenishes electrolytes and restores fluid balances. It ultimately provides detoxification by flushing out your system, delivering nutrients directly into your bloodstream, rehydrates your body, and ensures 100% absorption.
- B12:** A B-Complex vitamin associated with preventing memory loss and improving concentration, as well as boosting energy levels.
- B-Complex Vitamins:** A complex of five different vitamins that perform a range of vital functions including cardiovascular support, helping your body convert food into energy, immune function and more.
- Vitamin C:** A vitamin that plays many essential roles throughout your body, helping to maintain muscles and bones, immune support, and your circulatory system.
- Glutathione Push:** A highly concentrated dose of glutathione, a powerful antioxidant that provides immune system support, detoxifies your body, removes free radicals, boosts energy levels, and improves neurodegenerative diseases.
- Anti-Nausea Medication:** Helps calm your stomach and improve your comfort during your recovery.
- Anti-Inflammatory Medication:** Helps ease headaches and muscle aches, improving your overall comfort during recovery.

VITAMIN BOOST INJECTIONS
